PROFILE

First-year Master's student in Business Intelligence, holding a Bachelor's degree in Management and Quantitative Techniques obtained in September 2026. Focus on Data Science, data analysis, Artificial Intelligence and financial applications. Experience at the BEAC, where I designed DAN to automate and structure part of the off-site oversight of CEMAC payment systems and means of payment. Interested in decision support, automation, Business Intelligence, generative AI, prompt engineering and data applications in finance.

PROFESSIONAL EXPERIENCE

Data / Payment Systems and Means of Payment Intern | BEAC (Bank of Central African States) June to August 2026

- Took part in the activities of the Payment Systems and Means of Payment Department (DSMP); worked on the SYGMA, SYSTAC and SWIFT payment systems within the scope of the activities studied during the internship.
- Designed DAN, an application aimed at automating and structuring part of the off-site oversight of CEMAC payment systems and means of payment.
- Analysed and used payment-system data; used Python and data analytics tools to automate and structure data processing.
- Developed a tool supporting monitoring and risk analysis.
- Produced dashboards, indicators, analyses and reports to support decision-making.

Technologies: Python, Pandas, NumPy, Streamlit, SQLite, Data Analytics, generative AI, automation.

Intern | AFRILAND FIRST BANK July to August 2024

- Customer reception and guidance; account opening and management; power-of-attorney procedures; overdraft-related operations.

Intern | AFRICA FINANCE (formerly EIA Microfinance) July to August 2025

- Customer reception; account opening and management; prospecting.

PROJECTS & ACTIVITIES

DAN: payment systems monitoring application

- Project developed as part of the BEAC internship and the dissertation.
- Automation and structuring of off-site oversight; analysis of payment systems.

HEALTH CARE | Startup Weekend IUSJ 2026 | Participant, technical lead

- Took part in the Startup Weekend organised by IUSJ in January 2026; designed a startup called Health Care; in charge of the technical side of the project; won **First Prize** at the Startup Weekend.

BUSINESS GAME IUSJ 2025 | Participant

- Took part in the IUSJ Business Game in 2025; simulation experience in management, strategy and decision-making.

TECHNICAL SKILLS

Data & Business Intelligence: Data analysis, Data analytics, Business Intelligence, Data preprocessing, Feature engineering, Data visualisation, KPIs & dashboards, Data analysis and interpretation.

Programming & Data: Python, Pandas, NumPy, Matplotlib, SQL, Excel, Streamlit, SQLite.

Artificial Intelligence: Machine Learning, Generative AI, Prompt engineering, Prompt design and optimisation, Using LLMs, AI-driven automation, AI agents, AI workflows.

AI / Machine Learning: Classification, Regression, Anomaly detection, Time series, Model evaluation.

Tools / environment: Git / GitHub, Streamlit, SQLite, Microsoft Excel, Microsoft Word, Microsoft PowerPoint.

EDUCATION

Master's degree in Business Intelligence (Year 1) | IUSJ | In progress (2026)

Bachelor's degree in Management and Quantitative Techniques | IUSJ | 2023 to 2026

Institut Universitaire Saint Jean du Cameroun (IUSJ): thesis defended with **"Excellent"** distinction, September 2026

Baccalauréat C (mathematics and physical sciences) | Lycée bilingue de Mimboman | 2023

LANGUAGES

French: native

English: B1, intermediate

German: beginner

PROFESSIONAL QUALITIES

Analytical mindset, Problem solving,
Adaptability, Rigour, Creativity, Initiative,
Teamwork.

INTERESTS

Technology, Artificial Intelligence, Data
Science, Finance, Reading, Sport.
